## GARDEN ARMY OF CHILDREN PLANNED.

WASHINGTON, March 7.—Formation of the "United States Garden Army," with a membership of 5,000,000 children and having for its purpose the supplying of the family of each member with vegetables, small fruits and eggs during the summer and fall, was announced today by the Department of the Interior. The department is organizing the children in cities, towns, villages and suburban homes, while the Department of Agriculture is doing the same work with the children of the farming districts. The children will be in charge of 40,000 teachers, and there will be four or five general superintendents in charge of the districts in which the country is to be divided. The campaign will be marked by competitions and honors, prizes and distinctions will

be given the winners. Members will be permitted to display the insignia of the new service, "U. S. G. A."

The announcement says that officials and dignitaries from President Wilson down are taking an interest in the plan. Cardinal Gibbons has answered for the participation of the parochial schools.

It is planned to make the garden army a continuing process.

WILL HELP FARMERS  
BUY OR SELL SEED CORN

In an effort to help farmers obtain and dispose of seed corn so

that there will be a more equitable distribution, the College of Agriculture of the University of Kentucky has prepared blanks which are being sent to all county agents and to all banks in the State for the use of farmers. The blanks contain spaces where farmers can indicate the kind of corn they want or the kind they have for sale and spaces for other information purchasers may desire to have or sellers may desire to give. In this way it is expected that the college will act as a sort of clearing-house for this information. It is also proposed to issue market bulletins from time to time devoted to various farm matters. At present the bulletins will deal principally with seed corn.

## Swift & Company Publicity

At a recent hearing of the Federal Trade Commission there was introduced correspondence taken from the private files of Swift & Company, which showed that the Company had been considering for some time an educational advertising campaign.

The need for this publicity has been apparent to us for several years. The gross misrepresentation to which we have recently been subjected has convinced us that we should no longer delay in putting before the public the basic facts of our business, relying on the fair-mindedness of the American people.

The feeling against the American packer is based largely on the belief that the income and well-being of the producer and consumer are adversely affected by the packers' operations, resulting in unreasonably large profits.

Swift & Company's net profit is reasonable, and represents an insignificant factor in the cost of living.

For the fiscal year 1917 the total sales and net profit of Swift & Company were as follows:

Sales  
\$875,000,000.

Profits  
\$34,650,000.

This is equivalent to a \$3,465 profit on a business of \$87,500.

If Swift & Company had made no profit at all, the cattle raiser would have received only one-eighth of a cent per pound more for his cattle, or the consumer would have saved only one-quarter of a cent per pound on dressed beef.
